### DX News

#### **CY0S Sable Island -now QRT (by Murray WA4DAN April 1)**

The CY0S team departed Sable Island on Tuesday morning, March 31st, after 103,145 contacts with 169 DXCC countries. The team members are travelling back to their respective homes over the next few days. OQRS will be available by this weekend.

The team would like to thank the Parks Canada Sable Island staff members for their outstanding support to the CY0S team. We would also like to thank Sable Aviation and Vision Air Services for transporting the team to the island.

#### **3D2JK Lakeba Island OC-095 by Jacek SP5APW**

My activity from OC-095 is approaching soon. I am starting the trip next week. Before the flight to Lakeba I am going to stay a few days on Viti Levu (OC-016). During that time I will work on the 6m band, checking propagation.

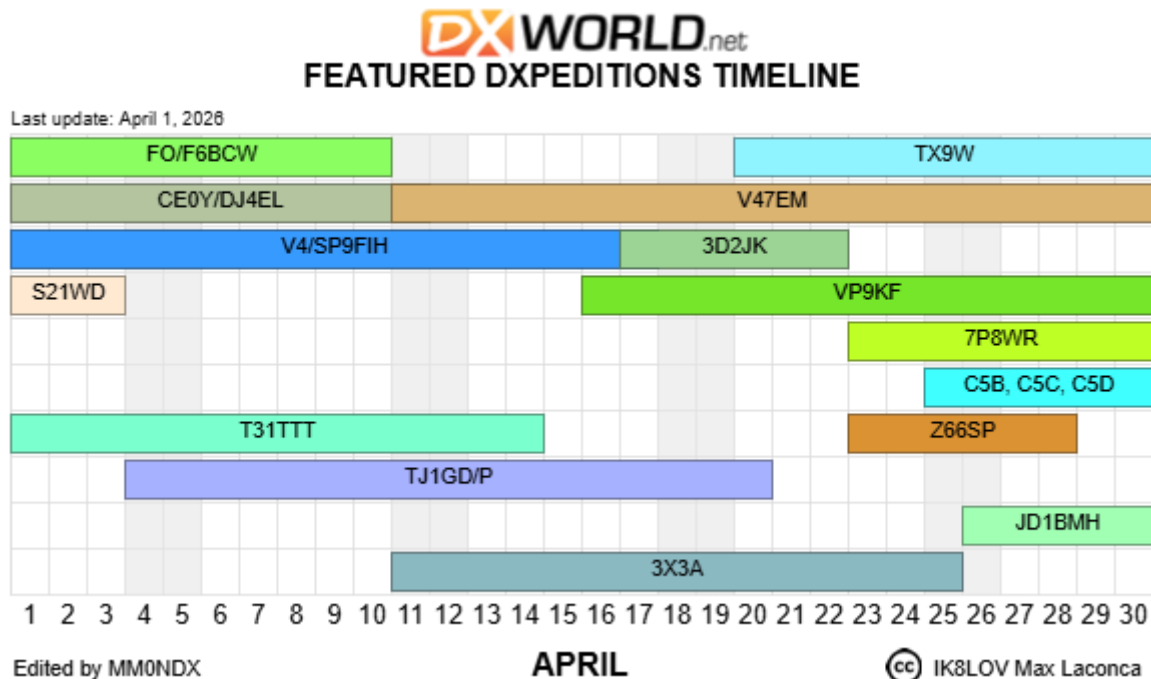

All the equipment is almost packed. I still need to pack spare BuddiHEX spreaders which will come to me today. Sincerely thanks to Chris W6HFP who provided me with those spares. The equipment packing wasn't an easy task not only due to the total weight restriction. The luggage must be ready to be easily split from big 30kg bags into smaller ones weighing 15kg each. This size of the single luggage is allowed on the last leg of the air journey. <https://www.dx-world.net/3d2jk-lakeba-island-oc-095/>

#### **T31TTT Kanton Island -update by Rebel DX Group**

Activity is still on slow-mode due to a lot more work than expected. Positive thing is that our stay will be much longer.

There's a big project on the horizon, so possible several months of activity (in and out for supplies by ship and airplane) including remote station for a very long time. This will allow all small pistols to end up in the log.

### QSL preview

Following numerous discussions and outreach efforts, our first formal meeting with the U.S. Fish & Wildlife Service (USFWS) took place in the summer of 2024. The purpose was to explore the feasibility of conducting an amateur radio DXpedition to Desecheo Island. Subsequent and careful coordination ultimately resulted in official permission being granted for this operation.

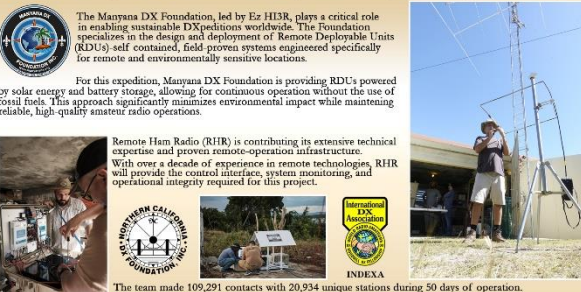

The Maurya DX Foundation, led by Ez H13R, plays a critical role in enabling sustainable DXpeditions worldwide. The Foundation specializes in the design and deployment of Remote Deployable Units (RDUs) self contained, field-proven systems engineered specifically for remote and environmentally sensitive locations.

For this expedition, Maurya DX Foundation is providing RDU's powered by solar energy and battery storage, allowing for continuous operation without the use of fossil fuels. This approach significantly minimizes environmental impact while maintaining reliable, high-quality amateur radio operations.

Remote Ham Radio (RHR) is contributing its extensive technical expertise and proven remote-operation infrastructure. With over a decade of experience in remote technologies, RHR will provide the control interface, system monitoring, and operational integrity required for this project.

The team made 109,291 contacts with 20,934 unique stations during 50 days of operation. It is now the record for most contacts in a low power expedition.
